EXPERIENCE

Talk Fast Social | Spokane, WA

Website Editor *June 2026 - Present*

- Update and maintain client WordPress websites, including layouts, content, images, navigation, and responsive design.
- Perform SEO research and optimization using Semrush and Rank Math, including keywords, SEO titles, meta descriptions, headings, and internal linking.
- Audit websites for accessibility, usability, broken links, outdated information, and opportunities to improve the user experience.
- Rewrite and optimize website content to improve clarity, search visibility, brand consistency, and audience engagement.
- Troubleshoot WordPress design and content issues across platforms and plugins including Elementor, Divi, and Agent Image.

Milkshake Interactive | Spokane, WA

Design & Web Intern *Apr 2026 - Present*

- Research guidebooks, Kickstarter campaigns, and single-product websites to guide strategy for a Post Falls climbing guidebook.
- Develop brand direction through typography, color, visual references, and an outdoors-inspired design system.
- Explore website structure, wireframes, and page layouts for selling the guidebook online.
- Research climbing areas, local sponsors, map approaches, and book layout ideas for the project.
- Organize research and design findings into clear recommendations for the final brand, book, and website.

Tinytall LLC | Spokane, WA

Front-End / Web Design Support *Sep 2025 - Jan 2026*

- Updated the NEWESD 101 public website and internal pages to improve readability, navigation, and information flow.
- Reworked page structure and modernized visual elements while following existing brand standards.
- Identified usability problems and shared clear, practical design solutions with staff.

American Advertising Federation | Spokane, WA

Volunteer *Jan 2023 - Jun 2025*

- Supported local creative events through check-in, space setup, signage, and attendee assistance.
- Helped prepare event graphics and design materials when needed.
- Assisted with the annual award show, including setup, teardown, and backstage operations.
- Worked with local designers and students on planning, research, and community programs.

SELECTED PROJECTS

JavaNoir | Front-End Development
Built a 16-bit noir scrollytelling website with HTML, CSS, JavaScript, and GSAP, including parallax motion, theme controls, and reduced-motion support.

The Last Place We Played | UX & Game Design
Designed a narrative adventure in GDevelop, shaping the art direction, interface flow, dialogue structure, and interactive scenes.

History of Web Design | Research & Web Design
Created an interactive educational site covering web design from 1995 to the present, with era-based visual systems and accessible interactions.
